Description and Purpose:

- + Fragrance free.
- + This scientifically-advanced formula boosts the power of aloe with a clinically tested ingredient, trifluoroacetyl tripeptide-2. In clinical tests, this single ingredient significantly improved skin elasticity and is known to combat progerin, a harmful protein that increases as you age and wreaks havoc on your skin. By mimicking natural skin processes, this three-amino acid peptide increases the appearance of firmness and reduces the look of fine lines and wrinkles.
- + That ingredient alone could be its own product, but we didn't stop there. Paired with hydrolysed sodium hyaluronate, a natural humectant, to support moisture and skin conditioners, *Firming Serum* is scientifically formulated so that aloe vera achieves its optimal benefits to soothe and smooth skin. Yeast extract helps support collagen synthesis and natural skin defences to reduce the appearance of uneven skin tone while whey protein revitalises the skin by increasing its smoothness, firmness and thickness. This stacked formula is a skin scientist's dream, bolstered with the power of nature and the most advanced laboratory findings to help you look and feel your best.
